For advice, contact Ramathibodi Poison Center (Phone: 1367) or a doctor.

#### Ingestion

Do not induce vomiting; Do not eat milk and castor oil, transport to nearest medical facility for additional treatment.

#### Eye Contact

Immediately flush eyes with large amounts of water for at least 10 minutes while holding eyelids open. Transport to the nearest medical facility for additional treatment.

#### Skin Contact

Remove contaminated clothing. Immediately flush skin with large amounts of water for at least 15 minutes, and follow by washing with soap and water if available.

#### Inhalation

Remove to fresh air. If the victim has difficulty breathing or tightness of the chest, give 100% oxygen with rescue breathing or CPR as required and transport to the nearest medical facility.

#### First Aid facilities

Provide eye baths and safety showers.

### **Medical Attention**

Treat according to symptoms. Avoid gastric lavage: risk of aspiration of product to the lungs with the potential to cause chemical pneumonitis.

## **5. FIRE FIGHTING MEASURES**

Shut off product that may 'fuel' a fire if safe to do so. Allow trained personnel to attend a fire in progress, providing firefighters with this Safety Data Sheet. Prevent extinguishing media from escaping to drains and waterways.

### **Suitable extinguishing media**

Water spray or fog, Dry chemical powder, Alcohol-resistant foam and Carbon dioxide.

### **Hazards from combustion products**

May produce toxic fumes of carbon monoxide, carbon dioxide if burning.

### **Precautions for fire fighters and special protective equipment**

Wear full protective clothing and self-contained breathing apparatus.

### **Special protective action for fire-fighters**

Keep adjacent containers cool by spraying with water.

## **6. ACCIDENTAL RELEASE MEASURES**

### **Emergency Procedures**

Prevent fluid from escaping to drains and waterways. Contain leaking packaging in a containment drum. Prevent vapours from building up in confined areas. Ensure that drain valves are closed at all times. Clean up and report spills immediately.

### **Methods and materials for containment**

#### **Protective Measures**

- Observe all relevant local and international regulations.
- Avoid contact with spilled or released material. Immediately remove all contaminated clothing. For guidance on selection of personal protective equipment see chapter 8 this Material Safety Data Sheet. Shut off leaks, if possible without personal risks. Remove all possible sources of ignition in the surrounding area. Prevent from spreading or entering drains, ditches or rivers by using sand, earth, or other appropriate barriers.
- Take precautionary measures against static discharge. Ensure electrical continuity by bonding and grounding (earthing) all equipment.

#### **Clean-Up Methods**

- ◆ Small spillage (< 200 LT) : Transfer by mechanical means to a labeled, sealable container for product recovery or safe disposal. Allow residues to evaporate or soak up with an appropriate absorbent material and dispose of safely. Remove contaminated soil and dispose of safely.
- ◆ large spillage (> 200 LT) : Transfer by mechanical means such as vacuum truck to a salvage tank for recovery or safe disposal. Do not flush away residues with water. Retain as contaminated waste. Allow residues to evaporate or soak up with an appropriate absorbent material and dispose of safely. Remove contaminated soil and dispose of safely.

#### **Other Information**

Notify authorities if any exposure to the general public or the environment occurs or is likely to occur.

## **7. HANDLING AND STORAGE**

### **Precautions for safe handling**

Avoid contact with skin, eyes, and clothing. Do not breathe vapours. Extinguish any naked flame. Remove ignition sources. Avoid sparks. Do not smoke. The vapour is heavier than air spreads along the ground and distant ignition is possible. Ensure electrical continuity by bonding and grounding (earthing) all equipment. Do not use compressed air for filling, discharging, or handling operations. Handle and open container with care in well-ventilated area. Do not empty into drains.

### **Conditions for safe storage**

Must be stored in a diked (bunded) well-ventilated area, away from sunlight, ignition sources and other sources of heat. Bulk storage tanks should be diked (bunded). Keep away from aerosols, flammables, oxidizing agents, corrosives. Storage Temperature: Ambient.

#### **Recommended Materials**

For containers, or container linings use mild steel, stainless steel.

#### **Product Transfer**

Keep containers closed when not in use. Do not use compressed air for filling, discharging, or handling operations. If positive displacement pumps are used, these must be fitted with a non-integral pressure relief valve. Ensure electrical continuity by bonding and grounding (earthing) all equipment.

#### **Additional Advice**

Containers even those that have been emptied, can contain explosive vapours. Do not cut, drill, grind, weld or perform similar operations on or near containers.

### 8. EXPOSURE CONTROLS: PERSONAL PROTECTION

#### **National Exposure Standards**

Occupational Exposure Limits

TLV-TWA = 20 ppm (121 mg/m<sup>3</sup>) 8 Hours.

TLV-STEL = 50 ppm (240 mg/m<sup>3</sup>)

#### **Engineering Controls: Ventilation**

Provide exhaust ventilation or other engineering controls to keep the airborne concentrations of vapours below their respective threshold limit value.

#### **Personal Protective Equipment**

##### **Respiratory Protection:**

Vapor respirator. Be sure to use an approved/certified respirator or equivalent. Wear appropriate respirator when ventilation is inadequate.

**Eye Protection:** Chemical splash goggles (chemical monogoggles).

**Skin/ Body Protection:** Use protective clothing which is chemical resistant to this material. Safety shoes and boots should also be chemical resistant.

**Hand Protection:** Butyl rubber gloves, Nature rubber gloves, Neoprene rubber gloves, Nitrile rubber gloves.
